

INTERDISCIPLINARY STUDENTS' SEMINAR

Since 2014 the college has been organizing interdisciplinary students' seminar every year. In such seminars, students across the disciplines present papers along with power point presentation with the help of their respective teachers. Even before the introduction of CBCS system the institution has encouraged interdisciplinary approach in UG teaching and the students' seminars bear witness to this. The outcome of such seminars has been observed in the enhanced confidence of the students. Best presentations are awarded and the students participate in the events enthusiastically.
